

INTEROFFICE CORRESPONDENCE

DATE: August 18, 1994
TO: K. G. Peter, RCRA Regulatory Programs, Bldg. T130C, X6345
FROM: J. A. Ledford, Solar Pond Projects, Bldg. 080, X8673 JAL
SUBJECT: CHANGE TO INTERIM STATUS FOR UNIT 21, BUILDING 788 -
JAL-030-94
DOE Order: 4700.1
Action: Process Request for Change in Interim Status

Last fall, your organization reviewed the interim status for Unit 21 in Building 788 and advised Solar Pond Projects (SPP) that a change in interim status would be advisable if the need to store mixed hazardous waste from strip-outs and closure activities arose. It now appears that the flexibility to store such material in Unit 21 will be vital to efficient use of resources and to facilitate RCRA compliance during site preparation activities. This waste stream would include wastes generated from both closure and non-closure construction activities performed inside as well as outside the boundaries of Operable Unit (OU) 4, but all generated as a consequence of the OU 4 remediation. Please initiate the request for the change, adding "other mixed hazardous waste streams" to Unit 21 as soon as possible.

Please work with Michelle McKee, extension 8717, and Kathy London, extension 8585, to establish a schedule and work out the details. If field activities are begun using 90-day storage, it will be important that subsequent storage space is available in time.
